## **KANYASHREE UNIVERSITY**

## M.Sc. 1<sup>st</sup> Semester Examination-2024

**Subject: Food & Nutrition** 

Course- CC 5

## **Nutritional Biochemistry**

**Full Marks-40** 

**Time-2.00 Hours** 

Group A [Answer **any four** of the following]

 $(5 \times 4 = 20)$ 

1.	Name the enzymes involved in electron transport chain. What function does lactate enzyme perform?	dehydrogenase $(2.5 + 2.5)$	
2.	'hat is the main purpose of urea cycle? Discuss the role of carbamoyl phosphate in this cycle.		
		(2.5 + 2.5)	
3.	What is the fate of pyruvate in aerobic degradation of glucose? At which step of Kreb's c	is the fate of pyruvate in aerobic degradation of glucose? At which step of Kreb's cycle does	
	GTP production occur?	(3 + 2)	
4.	here does glycogenolysis occur in the body? What is the net yield of ATP in TCA cycle in		
	presence of oxygen?	(2+3)	
5.	Discuss the hormonal regulation of blood glucose level in the body.	(5)	
6.	Describe schematically the synthesis of mevalonate from acetyl CoA.	(5)	
7.	State the Michaelis-Menten equation of enzyme kinetics? What is a holoenzyme?	(3+2)	
	Crown B		
	[Answer <b>any two</b> of the following] (10	0×2=20)	
1.	Explain the gluconeogenesis pathway and its significance.	(5+5)	
2.	Write down the steps of pentose phosphate pathway. Why is it important? Distinguish between		
	hexokinase and glucokinase.	(5+3+2)	
3.	What is enzyme inhibition? Classify different forms of enzyme inhibition with example	is enzyme inhibition? Classify different forms of enzyme inhibition with example. What is	
	Lineweaver-Burk plot? How does it help to determine the type of enzyme inhibition? (2)	2+3+2+3)	

4. What are eicosanoids? Give an example. Explain how the de novo fatty acid biosynthesis pathway is regulated? (2+1+7)
